

KNOWSOFT CHURCHGATE

Complete User Manual

Members · Church Admins · General Admin

Version 1.0

1. Introduction

Knowsoft Churchgate connects global, country, state, group and district churches with members in one platform. Members grow spiritually; church leaders manage people, programs and data; General Admin oversees the whole system.

2. Getting started

- Open the website and use Login or Register as member / Register church.
- Members select global → country → state → group → district when joining.
- Church registration follows hierarchy (Global first, then children under parents).
- General Admin approves global churches and can deactivate them.
- Change password anytime under Password in the menu.

3. Roles

- General Admin: all churches, backup, footprints, subscriptions, music platform links, featured home programs.
- Church Admin (sub-admin): members, approvals, attendance, church music, pastor messages, export CSV/PDF, network, programs.
- Member: spiritual space (Bible, Angel, music, devotion, subscription, messages) after approval.

4. Member portal — My Spiritual Space

After login, approved members open My dashboard / portal.

- Themes: royal blue, pink, green, white.
- Digital clock: compact local time at the top (above Angel).
- Angel: tap Angel to turn on. Stays silent and listening until you speak or use buttons. Say “Angel stop” or Turn off to stop. Sticky panel stays visible while you scroll.
- Angel can: play/change/stop music; Bible topics (Jesus, God, creation, faith, holiness, rapture, end time, Holy Spirit); salvation prayer; status/subscription; devotion times; programs; pastor info; focus groups; look up verses.
- Bible: books, situations, continuous reading, voice with volume control.
- Music: two columns — Church music (your church) and General music (platform). Select a song and press Play.
- Devotion alarms, evangelism bar, prayer board, testimonies, focus groups, Heart to Heart, subscription timer.
- New Born in Christ certificate after accepting Jesus via Angel / certificate button.
- Sample members: short trial, then locked awaiting full registration (not logged out).
- Expired subscription: resources locked until payment confirmed; Subscription page still available.

5. Church admin tools

- Dashboard: stats, charts, PDF report.
- Members & Approvals: approve join requests; edit status (worker, leader, pastor).
- Church music: YouTube links for your level only (Global stays global).
- Pastor messages: text + optional YouTube for members.
- Export data: CSV (Excel) and PDF; upload CSV to update members.
- Programs: photo or video (not both); request home display for General Admin approval.
- Focus groups, projects, network tree, create sub-churches.

6. General Admin

- Admin home: churches, users, pending approvals.
- Backup: full JSON download and restore.
- Footprints: login and activity log (name, email, IP, location hint).
- Subscriptions: set prices; confirm payments.
- Platform music links for all members.
- Featured global programs on the public home page.

7. Hierarchy & data

District is the primary data unit. Stats and members roll up through group → state → country → global. approved, cleared members access their church scope.

8. Sample logins (after seed deploy)

- General Admin: set on first deploy / seed (see your ops notes).
- Global sample: global@knowsoftchurch.org / Church@12345
- Sample member: member@knowsoftchurch.org / Member@12345 (short trial).

9. Tips

- Use Chrome or Edge for Angel voice.
- Allow microphone when Angel asks.
- Hard-refresh after updates (Ctrl+F5).
- If music is empty, church admin should add links under Church music.

10. Support

For technical issues, contact your General Admin or Knowsoft Cloud Air support channel for your deployment.
